

Make the right technology call. Then make it work.

New technology isn't always the answer. We help leaders decide where it makes sense, then work with their teams to put good decisions into practice.

HOW WE HELP

01

Technology & AI direction

Make better choices before committing money, time or people.

- Technology and AI strategy, governance and risk
- Investment choices: buy, build, simplify or stop
- AI use cases and emerging tech

A clear choice and a realistic plan for what comes next.

02

Transformation & delivery

Get difficult programmes moving and make change work in practice.

- Transformation and complex programmes
- Recovery when delivery stalls
- Operating models and practical adoption

Plans move forward, and teams know how to keep going.

03

Executive technology leadership

Independent judgement and experienced leadership when it matters.

- Board and C-suite advisory
- Interim CIO, CTO or programme leadership
- Coaching and internal leadership development

Leaders gain clarity. Teams gain confidence to continue.

WHY WORK WITH ASTAI

Experience that stays involved

Astai is led by Andrés Abad Rodriguez, with more than 25 years of experience across CERN, WHO, Gavi and Wella. Senior judgement stays close to the work.

The right expertise for each challenge

We draw on our independent Expert Network and selected technology partners when specialist skills are needed. Astai brings the work together and remains your point of contact.

WE BUILD, TEST AND USE TECHNOLOGY

We lead by example.

We have built Astai OS, our own agentic business operating solution to help run the business day to day and make practical technology available to other businesses so they can focus on their core business. We have also developed Cerebro to preserve and connect knowledge efficiently.

HOW WE WORK

01 Diagnose

Understand the real problem

→ 02 Align

Agree choices and ownership

→ 03 Deliver

Work alongside your team

→ 04 Transfer

Leave useful know-how behind

Technology makes change possible. People make it last.
